

TULLOCK ESSAY: Irreparable Damage

Pamela J. Brown (Ph.D., George Mason University)

Gordon Tullock's profound intellectual influence has caused irreparable damage to hundreds of well-intentioned students. My plans for a career in social engineering were permanently stymied by Tullock's research and lectures on bureaucracies, politics and the democratic process during grad school. Today I live under heavy sedation, without the will to vote. I am also a successful college instructor in Los Angeles, and enjoy spreading Gordon's unparalleled Public Choice insights to my own horrified students. Thanks Professor Tullock.
